Python at a Ruby Shop

9 / 79

Python at a Ruby Shop

- Lots of jokes because Python doesn't have "real lambdas"

10 / 79

Python at a Ruby Shop

- Lots of jokes because Python doesn't have "real lambdas"
- Seen as inelegant compared to Ruby, Elixir, Clojure

11 / 79

Python at a Ruby Shop

- Lots of jokes because Python doesn't have "real lambdas"
- Seen as inelegant compared to Ruby, Elixir, Clojure
- Dismissed as "dying language" because of perceived "failure" of Python 3

12 / 79

Python at a Ruby Shop

- Lots of jokes because Python doesn't have "real lambdas"
- Seen as inelegant compared to Ruby, Elixir, Clojure
- Dismissed as "dying language" because of perceived "failure" of Python 3
- Languages too similar: people apply Ruby idioms to Python

Smart Proxies

23 / 79

Smart Proxies

24 / 79

Smart Proxies

- Make outgoing connections appear highly available

25 / 79

Smart Proxies

- Make outgoing connections appear highly available
- Pause incoming requests

26 / 79

Smart Proxies

- Make outgoing connections appear highly available
- Pause incoming requests
- Custom rate limiting

27 / 79

Smart Proxies

- Make outgoing connections appear highly available
- Pause incoming requests
- Custom rate limiting
- Nonstandard configurations: SSL, connection persistence

28 / 79

Smart Proxies

- Make outgoing connections appear highly available
- Pause incoming requests
- Custom rate limiting
- Nonstandard configurations: SSL, connection persistence
- Complex retry logic

29 / 79

Smart Proxies

- Make outgoing connections appear highly available
- Pause incoming requests
- Custom rate limiting
- Nonstandard configurations: SSL, connection persistence
- Complex retry logic
- and more...

Python @ Braintree, 2013

33 / 79

Python @ Braintree, 2013

- In use for several proxies

34 / 79

Python @ Braintree, 2013

- In use for several proxies
- Served us well for a couple of years

35 / 79

Python @ Braintree, 2013

- In use for several proxies
- Served us well for a couple of years
- Several internal advocates

36 / 79

Platform Failure

37 / 79

Platform Failure

- Concurrency in the framework
(Tornado) not enough

38 / 79

Platform Failure

- Concurrency in the framework (Tornado) not enough
- Too much work to keep up with changes in Tornado

39 / 79

Platform Failure

- Concurrency in the framework (Tornado) not enough
- Too much work to keep up with changes in Tornado
- Using outdated Tornado version, so maintenance overhead is high

40 / 79

Platform Failure

- Concurrency in the framework (Tornado) not enough
- Too much work to keep up with changes in Tornado
- Using outdated Tornado version, so maintenance overhead is high
- High overhead to logging

41 / 79

Platform Failure

- Concurrency in the framework (Tornado) not enough
- Too much work to keep up with changes in Tornado
- Using outdated Tornado version, so maintenance overhead is high
- High overhead to logging
- No SNI Support

42 / 79

Application Failure

43 / 79

Application Failure

- Smart proxies are too smart

44 / 79

Application Failure

- Smart proxies are too smart
- Straightforward Python implementations not fast enough

45 / 79

Application Failure

- Smart proxies are too smart
- Straightforward Python implementations not fast enough
- Not smart enough

46 / 79

Application Failure

- Smart proxies are too smart
- Straightforward Python implementations not fast enough
- Not smart enough
- Not built for horizontal scalability

47 / 79

Solutions

48 / 79

Solutions

- NginX + HAProxy, PGBouncer

49 / 79

Solutions

- NginX + HAProxy, PGBouncer
- Node.js

50 / 79

Solutions

- NginX + HAProxy, PGBouncer
- NginX + HAProxy

Solutions

- NginX + HAProxy, PGBouncer
- NginX + HAProxy
- Clojure + Apache Kafka

52 / 79

Solutions

- NginX + HAProxy, PGBouncer
- NginX + HAProxy
- Tornado monkey patch

53 / 79

Python @ Braintree, Late 2014

54 / 79

Python @ Braintree, Late 2014

- All smart proxies on the way out

55 / 79

Python @ Braintree, Late 2014

- All smart proxies on the way out
- Not recommended for new projects

56 / 79

Python @ Braintree, Late 2014

- All smart proxies on the way out
- Not recommended for new projects
- Fewer internal advocates

57 / 79

Data Analysis

60 / 79

Data Analysis

- Replacing Excel

61 / 79

Data Analysis

- Replacing Excel
- Replacing SQL

62 / 79

Data Analysis

- Replacing Excel
- Replacing SQL
- Replacing R

63 / 79

Infrastructure Management

64 / 79

Infrastructure Management

- Resources - IP addresses,
physical ports, server locations

65 / 79

Infrastructure Management

- Resources - IP addresses, physical ports, server locations
- Cloud Instance Management

66 / 79

Infrastructure Management
